Empowering communities with sustainable solutions

Care for the Earth, Care for people, Fair share

JUNE 2013

JUNE PUBLIC INFO & GENERAL MEETING NIGHT Tuesday 18th

6:30pm for 7pm start.

Flexible Learning Centre, 90 Clarke street, Manunda

Clarke Street comes off Hoare on the Salvos Corner. Has wheel chair access.

If you can spare the time, come early (6.15) to help us set up tables and chairs.

Members please bring a plate of food to share when we have a break for dinner, or make a small donation towards the refreshment costs.

OOH and bring a friend, all welcome but !

Financial Members are free but un- financial members and non members pay \$5 for the info night and dinner

GUEST SPEAKER:

Daryl Killin, is a professional forester with 20 years experience in tropical forestry, with time spent in both government and corporate roles. As a Director of Select Carbon Pty Ltd, I now develop and manage carbon and forestry projects that provide carbon credits for clients looking to manage their carbon emissions. Select Carbon is recognised under the federal government's Carbon Farming Initiative as a Recognised Offsets Entity. Our Native Conifer Carbon Sink Project is Australia's first carbon sink project approved under the Permanent Environmental Plantings approved methodology of the Carbon Farming Initiative.

He will be talking about Biochar and the Carbon Sink Project in North Queensland.

Principle 6 - Produce no waste

We continue with the presentation of another of the 12 Principles of Permaculture as written by David Holmgren.

The earthworm is a suitable icon for this Principle as it lives by consuming plant waste which it converts into humus, that improves the soil for itself, for soil micro-organisms, and for the plants.

If you would like to know more about David Holmgren's Principles and Practices of Permaculture see them at <http://permacultureprinciples.com>

News from the Management Committee

Permaculture Cairns is now a member of Lets so we can accept 50% Bartles and 50% Cash for workshop fees for the SKILLING WORKSHOPS SERIES.
We cannot accept Bartles for memberships fees.

For those that don't know what Bartles are, then you need to join LETS a local energy transfer system which keeps the energy and money within the local area. Once you have joined Lets you can trade with others in Lets for goods and services with no money changing hands or part money and part Bartels.

Tegan , Bruce and Leon are the organisers for the Monthly Meetings if you have something to add to the meetings please speak with one of these great people who all hold a Permaculture Design Certificate.

SKILLING WORKSHOP SERIES

Ferro Cement Construction **With Bruce Zell**

Saturday 15th June 9am for 9.30 start – Finish 12.30

Introducing Your Workshop Facilitator

Bruce Zell has worked as a tradesman solid render plaster, concreter, steel fixer and Structural Landscaper in the Cairns Region for over 40 years

He has worked on a Ferro cement yacht construction, made numerous in ground water gardens, swimming pools and very large water garden pots and garden edging. Bruce has experimented with a variety of add mixes including colour oxides, plasticisers and waterproofing agents, textured coatings and surfaces. He has introduced glass windows, underwater lighting and power inlets for submersible pumps

About: Creating Structures in your Garden Landscape

Timber, Steel, Plastics Formed Concrete and other materials just don't always quite cut it with some projects around your garden landscape or farm. Timber has to be maintained and treated to beat rot and termites. Steel rusts. Plastic well its plastic. Concrete is kind of clumsy and can take up valued space. All of the above are expensive

There is an alternative that has been used for a very long time that

- **is not attacked by termites,**
 - **does not rust,**
 - **is very strong**
 - **has a thin profile**
 - **is much cheaper**
- **lasts for a long time**
- **is relatively cheap**
- **not rocket science**
- **requires minimal tools & equipment**

The Ferro Cement Workshop

Bruce provides a very hands on experience with the construction of a Ferro Cement sleeper, with a focus on garden edging. Demonstrating the use of wire, steel fabric, tie wire, clips, render mixing and application.

He will explain how to work Ferro cement into a properly finished product demonstrating design, materials selection, site set up, tools, preparation and process.

You will have the opportunity to see video footage that Bruce and others have produced in North Qld as well as other footage that has been collected of a variety of projects both big and small especially for this workshop.

Hopefully there is something in this for you. Enough at least to go home and get started immediately with little effort.

**COST:- \$40 or LETS Members \$20 and 20 Bartles
Morning tea is provided**

Registration is essential

To register email:- workshops@permaculturecairns.org.au

Payment is required by the 10th June.

**Payment may be made in person at Cairns Penny Bank in Grafton Street or
ONLINE to Permaculture Cairns Bank Account BSB 704-966 A/c
100009440. (Please use your surname and Ferro as the Reference), by MAIL TO
PO Box 6535 CAIRNS, OR Permaculture Meetings, 3rd Tuesday of the month**

How to make a Wicking Bed **With Len Specht**

Saturday 6th July 9am for 9.30 Start – Finish
12.30

This is a hands on workshop where you will make your own wicking bed from materials supplied.

A Wicking bed is a large pot with a water reservoir in the base, the water wicks up through the soil to water the plants. Benefits: No need to water every day, saves water and plants are moist at all times. Len will advise on fittings and potting mix and how to check the water levels.

COST:- \$40 or LETS Members \$20 and 20 Bartles
Morning tea is provided

Registration is essential

To register email:- workshops@permaculturecairns.org.au

Payment is required by the 1st July.

Payment may be made in person at Cairns Penny Bank in Grafton Street or ONLINE to Permaculture Cairns Bank Account BSB 704-966 A/c 100009440.(Please use your surname and Wicking as the Reference), by MAIL TO PO Box 6535 CAIRNS, OR at Permaculture Meetings, 3rd Tuesday of the month.

NEWS

The Queensland government
Is looking for input on their plan for the next 30 years at
<http://queenslandplan.qld.gov.au/get-involved/have-your-say/index.html>

Please find the time to HAVE YOUR SAY, it would be good if all who receive this newsletter spent a little time to tell the pollies just what we want for our Queensland.

SOME BAD NEWS

The electric ant, *Wasmannia auropunctate*, is an exotic pest ant that is only found in the Cairns region of Australia. The electric ant is considered to be one of the world's top 100 worst invasive species. They are a serious environmental economic and social pest causing a decline in diversity and abundance of invertebrates, vertebrates and some plants due to predation.

What do they look like?

Workers are 1 to 1.5mm in length, light brown to golden brown in colour; deliberate but slow moving, usually forming distinctive foraging lines. They tend to use manmade objects as pathways, eg. Fence lines, concrete edges, coppice logs, sleepers etc.

If you find a suspect ant you can call 132 523 and ask for a free yard check or sample pick up, or bring a sample into the DAFF office at 21-23 Redden Street, Portsmith.

Where are they found?

First confirmed as present in Australia in Smithfield in May 2006, since then they have been found in many of the Cairns northern suburbs, as well as Port Douglas, Kuranda, Redlynch, Brinsmead, Kanimbla and most recently Bentley Park.

Because they do not form distinctive nests they can be very difficult to spot. They do not dig holes but prefer to nest in or under objects. The most common areas of a property that electric ant can be found are in garden beds under the leaf litter, in or under logs, stones, bricks and blocks, pot plants, garden sleepers, or other things left in a garden for any length of time: in trees (especially fruit trees or those with epiphytes) around water, such as ponds, pools or outside taps: along fence lines, concrete edges and other man-made pathways.

How are they spread?

The most common method is through human assisted movement and in Cairns this means movement of infested pot plants or other high risk materials, such as plants or plant related items, pots, cuttings, garden waste, soil, fence palings, containers such as bins, bee hives, cartons, garden sleepers, mulch, hay or straw, building waste materials formwork and skip bins.

The majority of infestations in the past have been traced to the inadvertent movement of contaminated pot plants or the illegal dumping of green waste.

If you would like any other information please call 13 25 23 or visit our web site at www.biosecurity.qld.gov.au

MORE BAD NEWS(An article from the US groups who investigate and report on food and environmental products we should be buying) **Their web site: EWG.org**

Environmental Working Group's Guide to Triclosan

Triclosan is an antibacterial chemical found in many consumer products.

Where is triclosan found?

It's nearly ubiquitous in liquid hand soap and dishwashing detergent, but those aren't the only products it's in. Triclosan is also a common ingredient in toothpaste, facewash, deodorant, a host of personal care products, and even mattresses, toothbrushes and shoe insoles.

A U.S. FDA advisory committee has found that household use of antibacterial products provides no benefits over plain soap and water, and the American Medical Association recommends that triclosan not be used in the home, as it may encourage bacterial resistance to antibiotics.

What problems are associated with triclosan?

Triclosan is linked to liver and inhalation toxicity, and low levels of triclosan may disrupt thyroid function. Wastewater treatment does not remove all of the chemical, which means it ends up in our lakes, rivers and water sources. That's especially unfortunate since triclosan is very toxic to aquatic life.

HOW TO AVOID TRICLOSAN

Forgo antibacterial soap.

The American Medical Association says not to use it at home.

Watch for triclosan (and triclocarban) in personal care products.

Read ingredient labels or use Skin Deep to find products free of triclosan and triclocarban, its chemical cousin.

Avoid "antibacterial" products.

Triclosan is used in everyday products like toothbrushes, toys, and cutting boards that may be labeled "antibacterial," or make claims such as "odor-fighting" or "keeps food fresher, longer."

Triclosan may be in these products:

soap and dishwashing liquid

towels

mattresses

sponges

personal care products

shower curtains

toothbrushes

phones

kitchenware and plastic food containers

shoes

flooring and carpets

cutting boards

clothing and fabrics, toys

MORE NEWS ABOUT GENETICALLY MODIFIED WHEAT

USDA Expands Investigation Into Escape of Experimental Monsanto GM Wheat

By Elizabeth Renter

The USDA appears to be more concerned than they're letting on to over [the escape](#) of Monsanto's genetically modified wheat into the environment, expanding the investigation to include an additional number of investigators.

When the United States government says no to something, particularly a crop with unknown health effects that could be spread to the masses, Monsanto executives might want to listen up. *Unless of course* the [USDA](#) has let them run a little wild until now, spreading their franken-seeds all over the land.

Though it isn't clear how unapproved genetically modified wheat from Monsanto ended up growing in the wilds of Oregon, the investigation seeking to figure that out has just been expanded. According to [Reuters](#), last week there were 9 investigators from the USDA on the ground. Monday, the U.S. government announced that team had grown to 15, all the while saying the wheat likely hasn't made its way to "commerce."

Still, when the announcement was made last week that the wheat was verified as Monsanto's GM wheat (known as MON71800), several countries let it be known they weren't pleased and would not assume their imports were GM-free.

South Korea and other Asian countries as well as the European Union said they would all be subjecting their imports to rigorous testing. Japan even spoke out, rejecting any further wheat from the U.S.'s Pacific Northwest.

"Although our preliminary test result shows no genetically modified wheat was found, we are aiming to test all samples of wheat and flour imported from the U.S.," said an official from Korea's Ministry of Food and Drugs. Such scrutiny could ultimately hurt wheat markets as the country sourced roughly half of its total wheat imports from the U.S. last year.

The escapee wheat was discovered in April on an 80-acre field in Oregon. Farmers found the wheat when they realized it had survived spraying of the weed-killer glyphosate. The GM wheat was crafted by Monsanto specifically to resist pesticide exposure; it was 'RoundUp Ready'.

Global resistance to GM crops and wheat forced the company to stop work on the product several years ago, before it was ever approved. The last field trial was conducted in 2005.

So, how did the "experimental strain" of wheat get into an Oregon field? We don't know and there's no telling *if* we will ever be privy to that information. In the meantime, **the USDA is in damage control mode**, working to ensure Monsanto's recklessness doesn't have disastrous effects on the worth of U.S. wheat on the global markets.

This article was published at NationofChange at: <http://www.nationofchange.org/usda-expands-investigation-escape-experimental-monsanto-gm-wheat-1370615966>. All rights are reserved.

Seed Savers up North Meeting Notice

Our meetings are friendly and informal.
It's a time where we meet to share/exchange seeds and plant materials,
to swap ideas with and gather knowledge from other local gardeners.

Our Next Meeting will be held on:

Sunday 16th June 2013

Come anytime from 10:00am to 4pm

We will pack, clean, & register seeds,
share lunch and then wander through the garden,
followed by afternoon tea.

Venue:

Michael & Lindy Alba
17 Middlemiss St
Mareeba

For further information contact
Lindy on 40921116

LETS June Calendar

Saturday 15th – 9am-12.30pm – Ferro Cement Construction – Permaculture Cairns Skilling Workshop. Cost: \$20+20B. Registration is essential – To register email workshops@permaculturecairns.org.au with your LETS membership number. This is a Permaculture Cairns Event.

Sunday 16th - 2-5pm - Cassowary Coast Trade Afternoon at Johnstone River Community Garden, 19 Flying Fish Point Road. Bring afternoon tea to share. Tea/Coffee by gold coin donation. Children welcome. Contact Suari for more info 0403115261. Cassowary Coast Trade Afternoons are almost always on the third Sunday of the month. Car pooling/collection service encouraged from the Tablelands and Cairns!

Tuesday 18th – 6.30pm - LETS Trading at Permaculture Cairns meetings at the Flexible Learning Centre, 90 Clarke Street, Manunda. Cost for non-members to attend is \$5 for info session and supper.

Tuesday 18th - Doors open 7pm for a 7.30pm start. Movies that Matter – The Human Experience. What does it mean to be human? The film is divided into the three experiences... New York, Peru, and Ghana. Rated PG. Film Night at The Closet Hippy shop in Malanda. Refreshments available to purchase (please support our hosts), bring a small plate of healthful finger food to share if you wish during the film, and maybe a coat or blanket for your lap if it's a cold night! Entry by donation of \$/B. Phone The Closet Hippy shop on 04 3864 2498.

Saturday 22nd – 12.30-2.30pm - Yungaburra Trade Afternoon and Solstice Picnic Lunch in the Rotunda in Maude Kehoe Park. Bring a picnic rug or chair, lunch and drinks! Trading Record Sheet and pen, any goods you wish to trade, promotional material of any services you are offering if applicable. Children most welcome. This event is directly after the Yungaburra Markets, across the road, and it is right near the playground and toilets. Contact Melitta – 0437216122.

Saturday 29th – 2-4pm – Malanda Trade Afternoon at Mary & Mathieu's place, 7 Cleminson Close. Bring afternoon tea to share. Children welcome. Phone 4096 6651.

What to bring to Trade Night events where not specified above:

Food & drinks for yourself or to share, or money and/or Bartles at some venues

Friends

Trading Record Sheet and pen

Any goods you wish to trade
Table/rug to display them upon is often useful
Your own chair at some venues
Promotional material of any services you are offering if applicable
\$20 to join LETS if you are not yet a member
Not yet a member? Becoming a Tableland LETS account holder entitles you to:

Trade in Bartles with over 460 households and businesses across FNQ
Use the online noticeboard for trading at Community Exchange
Attend trade events, film nights and workshops and other LETS events
Connect with a huge network of LETS Users

Would you like to host a regular or one-off Trade or other LETS event? Contact us!
tablelandlets@gmail.com - 4096 6972 - lets.clearwater.com.au

www.communityexchange.net.au

30th June **Home Grown – Regional food showcase Lunch Event**

Community Foods Co- operative would like you to join them for “Home Grown” a regional food showcase. This banquet style, 3 course luncheon combines the amazing culinary talents of Craig Squire from the Ochre Restaurant and Davy O’Rourke from The Clever Duck. These chefs will be joining forces to prepare the lunch and giving you a firsthand account of life on the land up north. You will have the opportunity to chat with the farmer directly, hear them speak about their year so far and take home a menu, recipes and listing of available local foods. Tickets are \$45 each, for 12.30pm on Sunday 30th June at the Clever Duck, Forest Gardens. Book online at <http://www.comfoods.org.au>

Permaculture Design Course

30 Sept - 13 Oct 2013 at Ghost Gum Farm

DESIGNING A SIMPLER, MORE CONNECTED LIFE WITH PERMACULTURE

Ghost Gum Farm and Sustainability Alliance FNQ is hosting a Permaculture Design Course at Rossville (near Cooktown) from September 30 to October 13 2013.

The 14 day course run by Rick Coleman from the Southern Cross Permaculture Institute, will start the day after Wallaby Creek Festival finishes – www.wallabycreekfestival.org.au

Choosing to do a Permaculture Design Course (PDC), is a big commitment that we take very seriously; offering a high quality and memorable experience. This will be our first PDC here and we look forward to you sharing this with us.

This course will give you holistic decision-making solutions for food, water and energy security; regenerative shelter; building social capital; developing a sustainable economy, renewing local communities on all scales,

and many other needs. It will allow you to find solutions to the challenges presented by life in a post-industrial, debt and consumption based society, particularly understanding why there are rising living costs and how we, as individuals and communities, can evolve with it.

Permaculture uses ecological principles to design sustainable human communities that are harmoniously woven into the environment and that aim to have the diversity, stability, and resilience of natural ecosystems. It offers a framework for critical decision-making and right livelihood.

The permaculture design course teaches whole-systems thinking. What does that mean? Most of the time we're taught to think in terms of things: the parts and pieces that make up our world. This approach allows us to exclude supposed "externalities" like pollution, social disunity and other 'side effects', which often come back to haunt us later on. Systems thinking focuses on the relationships among the parts, the features that emerge from these relationships (often unexpectedly, just as suburban sprawl emerged from transportation improvements), and how the parts come together to make up greater wholes.

Systems thinking is the key to sustainable living. This certificate course will introduce you to strategies and tools for designing and living in landscapes, homes, businesses, and communities that are regenerative – that is, that go beyond not just depleting resources and the human spirit, but renewing and invigorating them.

In this course you will meet people concerned about the same things you are, and be inspired by them, and in many cases, form new collaborative relationships with them. Many people find Permaculture Design Courses to be one of the most transformative experiences of their lives. We hope you do as well.

A detailed understanding of Rick's Permaculture philosophy and background can be found here:
<http://www.aidreview.gov.au/publications/sub-coleman.pdf>

You can find out more about Rick Coleman and his previous Permaculture Design Courses at:
Website: <http://www.southerncrosspermaculture.com.au/welcome/>

Facebook: <http://www.facebook.com/SouthernCrossPermaculture>
Youtube: <http://www.youtube.com/user/SustainabilitySolved?feature=watch>

There will also be special guest speakers throughout the course and farm tours.

Topics Covered:

- * Origins, Development, Ethics & Principles of Permaculture
- * Energy Diversification; Production and Use – Static and Transportation
- * Basics of Ecology & Proven Knowledge on Climate, Water, Soils and Trees
- * Alternative and Complimentary; Formal and Informal Trade and Finance
- * Aquaculture & Appropriate Design and Technology
- * Pattern Literacy and Understanding
- * Energy Efficient Housing, Natural Building/Vernacular Architecture & Eco Village Design
- * Designing for Different Climatic Zones & Disaster Mitigation Strategies
- * Food Production Systems from an Urban to Rural Scale & Animal Integration
- * Bioregional & Local Strategies for Community Resilience and Capacity Building
- * Design Methods & Tools for Creative Design and Process
- and much much more

Costs & Accommodation: The course fee of \$1500 (early bird price \$1200 before July 1) includes handouts, all meals and camping. There are no other expenses. Sponsorship Packages through SAFNQ, social benefit discounts, LETS community currency part payments, work in exchange, and pension card holder rates are offered for this PDC. Offers are limited. Contact us to book.

You will be required to bring a tent, bedding, personal items, toiletries, any specific dietary requirements, and pen/paper. Mobile phone/broadband reception is available after a 10 minute walk. Please bring with you any resources you want to share with others in the course, including dvds, as there may be film screenings.

Please Note – Places are limited to 25 participants, so to avoid disappointment secure your place on the course with a \$300 (non-refundable) deposit. Please email for bank deposit details.

This is a child friendly event with earth friendly activities organised for our children.

For more information about the course please contact Scott, SAFNQ PDC Community Project Manager, at Ghost Gum Farm.

We look forward to sharing this experience with you.

For more information please contact Scott White, PDC Community Project Manager Sustainability Alliance FNQ

Email: courses@ghostgumfarm.com.au ☎ 07 4015 2339

<http://www.ghostgumfarm.com.au/> <http://www.sustainfnq.org/>

What permaculturists are doing is the most important activity that any group is doing on the planet. We know what details of a truly sustainable future are to be like, but we need options, we need people experimenting in all kinds of ways and permaculturists are one of the critical gangs that are doing that”

INTERNATIONAL PERMACULTURE CONVERGENCE **CUBA November - December 2013**

A Permaculture Design Course facilitated by internationally renowned teachers:

Ron berezan (CA), Brock Dolman (USA), Paulo Mellet (UK), Eric Toensmeier (USA) and Cuba's own Roberto Perez Rivero.

A 3 day Conference with the theme "Island Permaculture, urban Permaculture and Permaculture and Climate Change"

A 5 day Convergence

Visits to permaculture and sustainability sites in Havana and two provinces of Cuba to see examples of Permaculture CUBA STYLE.

KEY EVENTS AND DATES

Pre IPC International PDC

11-24 November 2013 Havana, Cuba

Conference Dinner and Gala

24 November 2013

Havana, Cuba

International Permaculture conference

25 – 27 November 2013 Havana Cuba

Visit to Urban Permaculture sites

28 November 2013-04-08 Havana, Cuba

Convergence

29th November – 3 December, 2013

Los Cocos, Mayabeque, Cuba

Permaculture tours

PERMACULTURE MEMBERS CLASSIFIED ADVERTISEMENT SECTION

RESOURCES:

Carol has lots of mature Moringa Tree cuttings for sale at \$2 each. (I charge for these as I paid someone to cut the tree down.) Available at meetings or ring 0414 900 717

PERMACULTURE CAIRNS NOTES from last years' Resilient Communities Workshops.

The Notes are available for purchase at the cost of only \$10.

This is a very informative booklet, definitely worth having. Available at meetings

VEGGIE VILLAGE DVD – a great little DVD with lots of info for those wanting to start a garden, worm farm, composting etc. only \$10 – available at meetings

SERVICES: Bruce Zell is a Permaculture Design Certificate Holder and can advise on designing and growing your garden for a fee, this could save you lots of \$\$\$\$\$\$\$ in the long run. Contact Bruce for more details.

SHARING:

Carol has lots of Arrowroot and Turmeric for FREE if you dig them up, contact Carol at meetings or ring 0414 900 717

A PLEA FOR HELP: Cairns head of special Education Services, Samallie Kasirye grew up in poverty in the village of Kalapata in Uganda and moved to Australia. She returned to her home village a few years ago to find the people struggling with poverty. She established the Kalapata Children's Charity to help her community. She is currently sponsoring twenty-two children from poor families and assisting to establish a medical clinic while helping families with gifts of seeds, educational materials, HIV/AIDS education and basic household items. The charity recently purchased 1,500 trees at a cost of just \$250 and has also contributed to the community by giving gifts of goats and cows. Samallie is returning to Uganda in late June so we want to raise enough money for her to buy a goat for her community. It takes two to tango so if we can buy two goats they can produce more goats to provide for more families within the village. We would appreciate any donations of either money or seeds for this community. All donations are gratefully received. This article is from the June Enviromart Newsletter, so see Di at Enviromart Australia if you have any spare cash or seeds for a good cause.

That's it for me, I hope to catch up with you at the meeting on Tuesday night.
Enjoy the wonderful weather we are having and good gardening.
Cheers and go lightly on the land.
Carol

Memberships are now WAY WAY WAY OVERDUE!!!!

All memberships become due and payable on the 31st December each year. These fees help us to keep things rolling, for example, public liability insurance, stationery, equipment, garden club subscription, bank fees etc – only \$20 for Singles and \$30 for Households, unchanged since 2007.

AND our INSURANCE only covers people for FOUR visits to our meetings so if you have been to four meetings and have not become a financial member and intend to attend meetings you need to cover yourself and Permaculture Cairns by signing up as soon as possible.

You can pay at meetings, or online into our Permaculture Cairns Bank Account: BSB 704-966 A/c. 100009440 with your Surname as reference. And an email to the Acting Treasurer would be excellent - carollaing@hotmail.com, while Lania is away on holidays
