Permaculture Cairns News

Empowering communities with sustainable solutions

Care for the Earth, Care for people, Share the excess

Care of the Earth, Care of

People. Share the excess

AUGUST Public Info & General Meeting Night

Tuesday 20th 6:30pm for 7pm start.

Flexible Learning Centre, 90 Clarke Street, Manunda

Clarke Street comes off Hoare on the Salvos Corner. There is wheel chair access.

If you can spare the time, come early (6.15) to help us set up tables and chairs.

Members please bring a plate of food to share for dinner, or make a small donation towards the refreshment costs.

OOH! and bring a friend, all welcome but !

Financial Members are free but un- financial members and non members pay \$5 for the info night and dinner

Guest speaker:

Peter Thomas is the proprietor of Performance Mowers and Chainsaws in Anderson Street Cairns. He has been in the motor industry all his life and did his apprenticeship in Cairns. He has specialized in small engine driven tools and machinery in the last 10 years.

Peter will focus on smaller engines that some of us use every day. He will talk about getting to know the machine you have, how it works, spare parts availability and the lifespan of the fuel (fuel is the largest problem with engine breakdowns)

In Permaculture we do our best to minimize the use of machinery however in development stages, machines are useful. Mowers, chainsaws and other machines with petrol and diesel driven engines are required and may be required for a long time yet.

LAST MONTHS' GUEST SPEAKER

Svargo Freitag a Director of The Kanjini Co-op explained the Vision and the Co-ops' plans for creating a community on 7500 acres of land close to the Emerald Creek Falls near Mareeba.

Their Mission is to live harmoniously as a mutually supportive and diverse community, to create abundance while being sensitive to sustainability and our ecological footprint.

If you are interested please visit their website at www.kanjini.org

The 12 Principles of Permaculture as written by David Holmgren.

Principle 8. Intergrate rather than segregate

By putting the right things in the right place, relationships develop between them and they support each other.

If you would like to know more about David Holmgren's Principles and Practices of Permaculture see them at <http://permacultureprinciples.com>

AND how did it all begin?

"It wasn't until the 1950s that I noticed that large parts of the system were disappearing. First fish stocks became extinct. Then the seaweed around the shorelines went. Large patches of forest began to die. I hadn't realised until those things had gone that I'd had become very fond of them, that I was in love with my country.

I started to realise that I knew a lot about physics but wasn't applying it to how I heated my house. And I was an expert on ecology but wasn't putting that into practice in my garden. I knew that I needed to convert the principles of environmental science into directives for planning, and then the idea of permaculture came to me.

It was like a shift in my brain, and suddenly I couldn't write it down fast enough. I felt like there was a roll of carpet tied up with string at my feet. Once I had cut the string, it just unrolled to the horizon and I could see forever, and nothing that has happened since has ever surprised me.

Agriculture is one of the greatest contributors to the destruction of our environment. Forty per cent of the world's soils and water has been polluted by farming.

The great challenge for sustainable agriculture is to produce the food and fibre needed, while maintaining fertile soils and clean water, and enhancing the health of ecosystems."

What is stopping Permaculture from becoming mainstream?

It takes time for a disruptive innovation such as permaculture to impact on established and successful civilisation. An irrational inertia kicks in to maintain things the way things were. This irrational inertia stems from clinging to world views that come from simpler times. Research in psychology commenced in the 1950s by Dr. Clare W. Graves revealed the existence of different patterns or worldviews of human consciousness that evolved in response to changing inner and outer life conditions over the last 120,000 years.

Each pattern in thinking has resulted in general shifts of civilizational styles, ranging from survival clans, to ethnic tribes, to feudal empires, to national states, to corporate states, to value communities and beyond. It is the national states and corporate states that created and sustains chemical-based industrial agriculture.

The research clearly highlights that over the last 100 years, for many individuals there are signs of a major leap towards new awareness that is aligned with the way all life works.

As life conditions on the planet become more complex, we will see more people evolve into Integral Consciousness where all decisions are based upon the magnificence of existence: where all-life embracing beneficial abundance becomes a distinct probability; and there is an innate capacity to adapt to and stabilize our planets ecosystems for the long run of time.

When we look at how the future will unfold as Integral Consciousness assumes a grand scale, we will see people reassessing what's important. We can anticipate a shift from physical accumulation to intellectual, emotional, relational and spiritual exploration. We will see the pursuit of wellbeing where less is more, through elegant simplicity. Anticipate the accelerated release of technology beneficial to all life, focused on the provision of basic needs such as water, food, energy, community, information and mobility.

These are the life conditions that will allow the message in the bottle about permaculture to be fully utilised. Integral awareness itself will create a surge in demand for permaculture and all it offers.

We offer five ideas about what comes next naturally, in our evolution as a species, to explore and develop together.

We offer five ideas about what comes next naturally, in our evolution as a species, to explore and develop together.

- 1. A new generation of easily accessible measurement instruments are required to assess the vitality of soil, plants, animals and humans. (CSIRO is working on this right now)**
- 2. We need to incorporate an understanding of the subtle yet vast dynamics of the microbiome in the way we grow and eat food. This is an emergent deep science that examines the complex eco-intelligences and subtle information exchanges that are at play in soil for growing food, and in the gut for digesting food.**
- 3. Nutritional and habitat requirements vary with each stage of human development. Reframing garden and home design as being about human evolution allows us to dramatically rethink every basic assumption.**
- 4. Human evolution is inevitable and can be eased and accelerated through governance, design and innovation that are beneficial for all life.**
- 5. A living organism of trusted and respected global wisdom, gained through collaboration with other growers on the same pathway is needed to overcome our irrational resistance to change.**

Permaculture has an essential role to play in the conscious redesign of our nutritional ecosystem. Dr. Graves provides us with maps for navigation human consciousness. We advocate that permaculturists become familiar with these maps of consciousness in order to develop premature to support the evolution of humanity with beneficially abundant food and habitat.

Further information: to learn more about human evolution, read the book, Spiral Dynamics, by Dr. Dion Beck and Chris Cowan, or visit this web site: www.5deep.net .

This article is from the UK, “PERMACULTURE” magazine written by Christopher and Sheila Cook and Ludwig Appeltans.

ThePermacultue magazine is excellent and well worth reading with news and innovative ideas from all around over the world.

News from the Management Committee

A big thank you to all who brought food for the last meeting, the carambolas and mandarins were delicious.

Permaculture Cairns members have the opportunity to access the Permaculture yahoo group when they join. Robert, the Administrator will contact you to see if you are agreeable to receive emails from the permaculture cairns yahoo group. The group has a forum for questions and info. Late news items not received in time for the Newsletter will also be sent through the yahoo group email so it pays to be a member.

The working bee last month was not well attended, only Tegan, Lania and Carol were then for a couple of hours and then Zane turned up, when we were about to knock off. We trimmed the trees and vines and tidied up the site. Mulched part of the area but there is still half of the area to do. So could we look forward to some more help next time. After all we have the use of the building and grounds for our events free of charge surely we can keep it looking good – many hands make light work. Perhaps after work in the afternoons for an hour or so would be good – what do you say??

Tegan, Bruce and Leon are the organisers for the Monthly Meetings if you have something to add to the meetings please speak with one of these great people. Ideas for Guest speakers are welcome.

NEXT SKILLING WORKSHOP will be in September

This month has been a very busy month with lots of events taking place, personal ones and others and has therefore been difficult to find a free Saturday for a workshop. Only 5 people have expressed an interest in the Cooking of Tropical Vegetables Workshop so have postponed this workshop until next month to give more people time to register an interest in attending.

JULY SKILLING WORKSHOP

Last month's Wicking Bed workshop on the Saturday the 6th JULY went well with 10 people putting together a wicking bed to take home for planting up. Len and Wendy did a great job of explaining the system and how it works, it will certainly save water and a lot of worry if you can't get home to water the plants every day. Although this workshop was only for a small bed, the actual design can be incorporated into any container with a hole for drainage or in the ground if the site is sloping and allows for drainage of excess water.

For morning tea Wendy made this extraordinary Banana cake and we all wanted the recipe, so here it is.

Banana Cake

125 g softened butter
1 ½ cups castor sugar
2 eggs beaten
1 cup (approx 3) mashed bananas
A few drops vanilla
250 g plain flour
1 tsp bicarbonate soda
½ tsp salt
½ tsp ground cinnamon
½ tsp ground allspice
½ cup butter or ½ cup milk with 1 tsp lemon juice

Butter and flour a 20cm cake tin then line base with baking or brown paper. Preheat oven to 180 F

Cream butter and sugar until pale and fluffy. Beat in eggs, banana and vanilla.

Sift dry ingredients and add to mixture, alternating with buttermilk.

Spoon into tin and bake for 45 minutes or until cake test clean.

Lemon syrup

Juice of one lemon

150g castor sugar

Dissolve sugar

Spoon syrup over hot cake while it is still in the cake tin.

Cool cake in its tin on a wire rack for a few minutes before turning out.

Cool completely before cutting or storing in an airtight tin.

Food Standards Australia calls for submissions on GMO soybean application

Food Standards Australia New Zealand (FSANZ) as invited submissions on an application to change the Food Standards Code to allow food derived from a genetically modified soybean.

The application, submitted by Bayer CropScience and Syngenta Seeds, sought permission to allow food derived from a soybean genetically modified to be tolerant to two herbicides, glufosinate-ammonium and mesotrione.

The FSANZ safety assessment found no public health or safety concerns and food from this soybean line is as safe for human consumption as food derived from conventional soybean. FSANZ welcomes comments from government agencies, public health professionals, industry and the community. The closing date for submissions is **23 August 2013** full details of the application and how to make a submission can be found on the FSANZ website - <http://www.foodstandards.gov.au>

E-waste Recycling comes to FNQ ?

The Scheme started in 2012 down south and aims to lift television and computer recycling from the current low rate of around 17 per cent to 80 per cent by 2021-22. This is important because these products contain valuable materials that can be re-used, as well as substances which are hazardous to humans and the environment.

The scheme will be funded and run by industry. The television and computer industry is now required by law to collect televisions and computers for recycling, and meet progressive recycling targets and criteria for safety and good environmental practice. All Scheme recycling arrangements must be approved by government. Householders and small business won't have to pay fees at the time of disposal.

Announcements from our Ministers – 1 August

The Minister for Innovation, Industry, Science and Research, Senator Kim Carr launches Australia's most powerful supercomputer, which also ranks as one of the largest in the world will enable scientists to gain new and valuable insights into issues of pressing national importance like climate change, water management and earth science. It also features a high capacity data storage and cloud computing systems in a purpose-built, state of the art data centre. The amount of information available to researchers is rapidly increasing, and it takes a big computer to crunch big data.

Much more info: <http://minister.innovation.gov.au/honkimcarr/media>

Federal Minister for Climate Change, Mark Butler today announced construction will start in January on the largest solar power station in the southern hemisphere after the Australian Renewable Energy Agency (ARENA) reached financial close with AGL Energy Limited. This project is 15 times larger than any other solar power station in Australia. The project will be built across two sites in Western NSW and will cover a combined area four times the size of the Sydney CBD.

Much more info: <http://minister.innovation.gov.au/markbutler/media>.

CSIRO news:

The latest CSIRO magazine ECOS has an article on Dr. Jeff Baldock talking about his work on soils and soil carbon, and explains how CSIRO is supporting land managers to increase carbon in our agricultural soils and take advantage of the federal government's Carbon Farming Initiative.

This is only one article worth reading, for example, Fast-growing alga brings bio-crude industry a step closer, Climate science and the tropics; recent findings, Barrier reef corals deliver world-first for sunscreen, Mildura solar power station finally complete and lots more - check out the website.

<http://www.ecosmagazine.com>

Beyond Zero Emissions

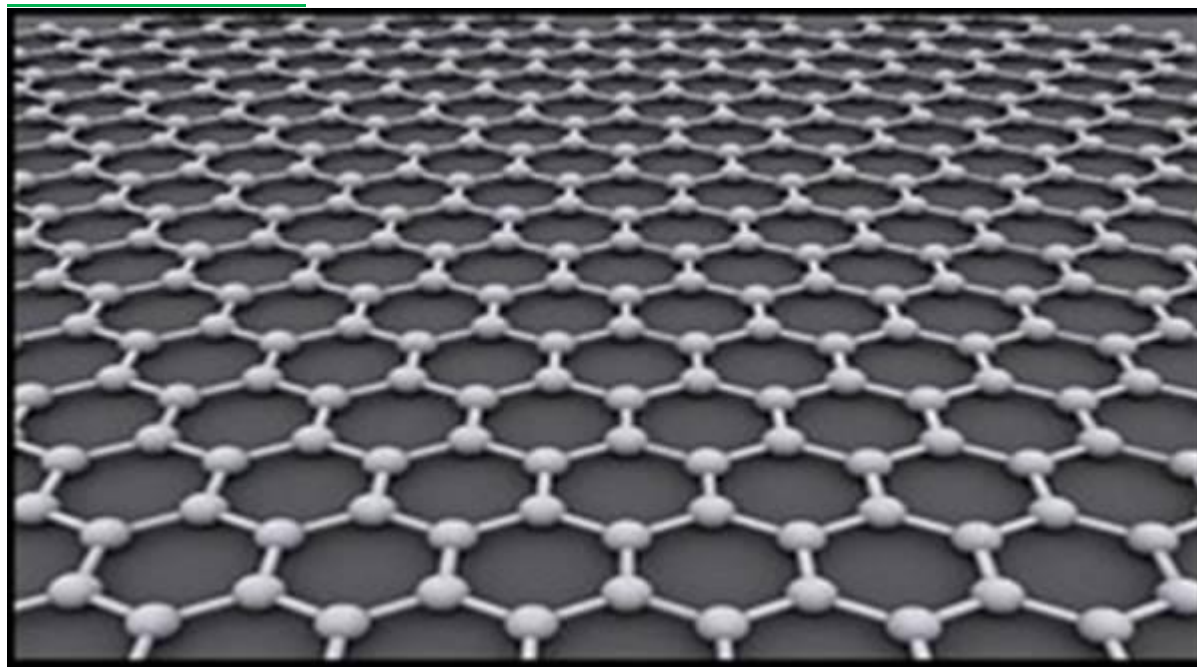

Launched the Buildings Plan in Melbourne and it was a great success. (The Building Plan is part of the Zero Carbon Australia Project which consists of six transitions plans covering the 6 sectors of energy, buildings, transport, land use, industrial processes and coal exports.)

The Building Plan report has certainly met with praise from experts in the field. Dominique Hes, Senior Architecture lecturer at the University of Melbourne, told the launch in Melbourne that the plan is “the largest crowd-sourced research project yet, and has maintained high academic quality,” and that she very much hopes to use it in her teaching! Soon there will be numerous reviews and media articles covering the Plan available on our website, and soon the Plan itself will be available for download. <http://www.bze.org.au>

Graphene: 200 times stronger than steel...150,000 times thinner than a human hair...more flexible than a sheet of paper

It is a newly discovered, very special refined form of graphite. It is a one-atom-thick sheet of densely packed carbon atoms arranged in a honeycomb lattice.

Take a look

Put simply, it is a sheet of carbon atoms 150,000 times thinner than a human hair. Under a powerful microscope, it looks like chicken wire. But what is so special about it? Everything- for starters, it is 200 times stronger than structural steel. So strong you could suspend an elephant from a single strand of grapheme and the strand would not break. It is extremely lightweight too. So in everything from bicycles and boats to aeroplanes and cars could be made out of grapheme composites. And when they are, their energy efficiency and durability could skyrocket. But that is just the beginning of what this new smart material can do.. Not only is it the strongest material researchers have ever tested -it is also one of the best conductors man has ever found. IBM has already created a graphene-based processor capable of executing 100 billion cycles per second. Researchers believe that in the future, a graphene credit card could store as much information as today's computers.

This one material alone could prove more revolutionary than – and soon REPLACE – plastic, Kevlar and the silicon chip.

In fact, it is such a breakthrough that the first two scientists to successfully produce single-atom-thick crystals of grapheme were awarded the 2010 Nobel Prize in Physics.

You are looking at a simultaneous eruption of new-age technologies that will alter our lives on a scale not seen for 100 years.

All this technological change and innovation will transform the world...

**‘Nano’ batteries, will charge your mobile in seconds – and even power whole cities...
‘Smartphones’ will carry the computing power of IBM’s Watson Supercomputer...
A new era of computing mobility – none of the solid rectangular things we carry now but flexible, wearable devices...**

Handheld ‘breathalyzers will diagnose disease in seconds...

**Bionic limbs with human fluidity and dexterity, but the strength of Superman!
Spacecraft with the capacity to take us beyond our solar system into places and worlds never explored..**

Google – “graphene “to read more about this fantastic new material

This article was received from by Bruce Zell of Backyard Revolution.

Date claimers

Italian Cured Meats - Master Class **Sausages made simple**

Learn to make your own quality small goods successfully at home.

All natural ingredients, and flavour. Made using traditional Italian methods and techniques. Make Italian Pancetta and Capocollo

Learn to make your own fresh produce, simply and successfully at home.

Where: Oak Grove Farm Cooking School, Atherton Tablelands

When: August 17th, 10.30am to 1pm

Bookings: sausagesmadesimple.com.au/rainforestbounty.com.au

The Organic Experience Tours are back

The full day tours will run on Saturday 24th and Saturday 31st August 2013.

Join the Organic Experience on a journey to the grassroots of local farming, local food and local producers. Meet the growers, tour the farm, sample some local delicacies and gain a deeper understanding and appreciation of how food connects our community, wellbeing and environment.

Two unique itineraries!

Details and bookings on the web site: www.theorganicexperience.com.au

A group of Permaculture members went on a tour last year and found it very entertaining and informative.

LETS August Calendar

Saturday 17th – 10am Kuranda Trade Day at Original Markets just near the Real Food Network & 100% Bartles LETS Shop! Lots of handmade products, an abundance of healthy fresh food, live music & fantastic company... Children welcome! **Contact Twiggy – 0439 768 264.**
Kuranda Market Day.

Sunday 18th – 12-3pm – Herberton Lunch and Trade Afternoon at Leeandra's place, 28 Perkins Street. Please bring lunch to share! Children welcome. **Contact** leeandranorman@gmail.com or **048861175.** Wondecla Market Day – head straight over after the markets!

Sunday 18th – 11am-3pm - Cassowary Coast Trade & Social Gathering at Johnstone River Community Garden, 19 Flying Fish Point Road. Bring a plate to share, something to cook on the BBQ if you wish, your own plate and eating utensils. Lunch will be at 12 noon. Tea/Coffee by gold coin donation. A child-friendly venue. **Contact Suari - 0403115261.** Car pooling/collection service encouraged from the Tablelands and Cairns!

Tuesday 20th – 6.30pm - LETS Trading at Permaculture Cairns meetings at the Flexible

Learning Centre, **90 Clarke Street, Manunda**. Cost for non-members to attend is \$5 for info session and supper.

Tuesday 20th - 7pm for a 7.30pm start - Movies that Matter – *happy!* - Film Night at The Closet Hippy shop in Malanda. Refreshments available to purchase (please support our hosts), bring a small plate of healthful finger food to share if you wish during the film. **Entry by donation of \$/B. Phone The Closet Hippy shop - 04 3864 2498.** *Does money make you HAPPY? Kids and family? Your work? Do you live in a world that values and promotes happiness and well-being? Are we in the midst of a happiness revolution?*

Friday 23rd - from 6pm - Malanda themed shared meal, social and trade evenings are held at Katrin's Place, 33 Park Avenue, opposite the Caravan Park near Malanda Falls Ph. 40966755 Plant stall out the front, large Queenslander. Family-friendly event! 6-6.45pm trading and circle time, 6.45-9.00pm shared meal and chat. **The theme is ROOTS.** Bring a dish featuring your favourite **root vegetable** - potato, sweet potato, carrot, taro, cassava, arrowroot... or spice - ginger, turmeric... Desserts and drinks are also welcomed.

Saturday 24th – 12-2pm - Yungaburra Trade Afternoon and Picnic Lunch in the Rotunda in Maude Kehoe Park. Bring a picnic rug or chair, lunch and drinks! Children most welcome. This event is close to and **directly after the Yungaburra Markets** right near the playground and toilets. Because it's market day, there's usually excellent live music playing for us from the verandah of the pub across the street! Great atmosphere. **Contact Melitta – 0437216122.**

Saturday 24th – 1pm-4pm – Fermenting workshop. 254 Picnic Crossing Road, "Brolgaspass", Yungaburra side of Strawberry farm. Follow the Gallery signs. \$20 + 20B per person or \$30 + 30B per couple. **Please contact Wayne - 0427551887.**

Sunday 25th – 10am – Cairns LETS Trade Event at Digger Street Arts Co-op, 107 Digger Street Cairns. For further details, please email louisemurley@hotmail.com. Looking to start another regular Cairns event – contact Louise with your ideas and offers of help!

Sunday 25th – time and venue to be confirmed – Millaa Millaa LETS Trade Event. Contact Kate on 04 2992 5246 or email kate.martignier@gmail.com.

Sunday 25th – 1pm-4pm - Edible Weeds Workshop. Learn to recognise weeds for everyday use, survival situations and medicinal purposes. 254 Picnic Crossing Road, "Brolgaspass", Yungaburra side of Strawberry farm. Follow the Gallery signs. \$20 + 20B per person or \$30 + 30B per couple. **Please contact Wayne - 0427551887.**

Thursday 29th – 6-8pm Trade Evening at The Octupi Garden Sanctuary, 78 Grigg Street, Ravenshoe (the lil blue shop). LET'S gather to share some food, trade our services, skills and wares. Children welcome! Please bring a plate. Contact **Hayley 0416 528 177 or hayleybuchanan8@hotmail.com.**

What to bring to Trade Events where not specified above –

Food & drinks for yourself or to share, or money and/or Bartles at some venues, Family, Friends, Neighbours, Trading Record Sheet and pen, Any goods you wish to trade and a table/rug to display them on is often useful, Your own chair at some venues, Promotional material of any services you are offering if applicable, \$20 to join LETS if you are not yet a member...

**tablelandlets@gmail.com - 4096 6972 - lets.clearwater.com.au

PDC's, Conferences & workshops:

Regenag upcoming courses in August 2013

Allan Savory 2013 Tour

Join Allan Savory, founder of Holistic management, for an evening talk or intensive seminar on how we can reverse desertification, heal landscapes, empower communities and reverse climate change.

August 14 and 15 in Brisbane,

August 16 and 17 in Sydney,

August 17 and 18 Melbourne

For details, check it out at: <http://regenag.com>

Kym Kruse of RegenAG is offering Members of Permaculture Cairns a 10% discount off the full price to attend any of the events. The code members will need to place in the payment page on the RegenAG website (e.g. Melbourne evening event here) is pcair

A little information on Allan and his work: <http://www.savoryinstitute.com/>

Allan's recent TED talk 22min long which has had over 1.5 million views –

http://www.ted.com/talks/allan_savory_how_to_green_the_world_s_deserts_and_reverse_climate_change.html

For those who are unable to make any of the city events, we are also running a live-stream webinar with the NLF – check out the RegenAG website for this.

Earthship Biotecture

Calling for Student Soldiers In Malawi, Africa - October 7th - 18th 2013

Michael Reynolds and the Earthship Biotecture crew will be working together with a team of volunteers to construct the Earthship Flower design to function as a community center in Malawi. <http://earthship.com/africa>

Permaculture Design Course in Rossville

30 Sept - 13 Oct 2013 at Ghost Gum Farm

Important Message from Scott regarding the upcoming PDC at Ghost Gum Farm, Rossville, they are offering a group discount for Permaculture Cairns members who would like to take part in the PDC. The offer is one free place for four paying places, and three free places for seven paying places.

Ghost Gum Farm and Sustainability Alliance FNQ is hosting a Permaculture Design Course at Rossville (near Cooktown) from September 30 to October 13 2013.

The 14 day course run by Rick Coleman from the Southern Cross Permaculture Institute, will start the day after Wallaby Creek Festival finishes – www.wallabycreekfestival.org.au

Facebook: <http://www.facebook.com/SouthernCrossPermaculture>

Youtube: <http://www.youtube.com/user/SustainabilitySolved?feature=watch>

For more information about the course please contact Scott White, PDC Community Project Manager

Sustainability Alliance FNQ Email: courses@ghostgumfarm.com.au ☎ 07 4015 2339

<http://www.ghostgumfarm.com.au/> <http://www.sustainfnq.org/>

INTERNATIONAL PERMACULTURE CONVERGENCE

CUBA November - December 2013

A Permaculture Design Course facilitated by internationally renowned teachers:

Ron Berezan (CA), Brock Dolman (USA), Paulo Mellet (UK), Eric Toensmeier (USA) and Cuba's own Roberto Perez Rivero.

More Info - Web Site: <http://ipc11cuba.com>

CLASSIFIED ADVERTISEMENTS

RESOURCES:

Moringa Tree cuttings for sale at \$2 each. Available at meetings or ring 0414 900 717 Also lots of Arrowroot for planting.

“Notes from the Workshops” All notes from the Permaculture Cairns Resilient Communities Workshops are now available for purchase at the cost of only \$10. This is a very informative booklet, with lots of info on organic gardening, earthworms, microgreens, wicking beds, aquaponics, tropical plants and some recipes for cooking these and much more, definitely worth having. Available at meetings and events.

Veggie Village DVD – a great little DVD with lots of practical info for those wanting to start a garden, worm farm, composting etc. only \$10 – available at meetings and events.

“Gardening in the Tropics” by Yvonne Cunningham's for sale at meetings \$28

SERVICES:

Bruce Zell, director of The Back Yard Revolution is a Permaculture Diploma graduate, Licensed Structural Landscaper and has extensive experience in landscaping, food garden design and implementation, project management and more. Contact Bruce for more details- email: brucezell@gmail.com, www.backyardrevolution.com.au or Mob. 0404 9944 528

SHARING:

Is there anyone interested in buying into acreage land with multi-occupancy or group title on the Atherton Tablelands in the Mareeba area. Contact Carol 0414 900 717

Memberships:

There are still some members who have not renewed for 2013, please let me know if you no longer want to be part of the Permaculture scene and I will remove your email address from our mail out list. Carol

Fees: \$20 for Singles and \$30 for Households, unchanged since 2007.

AND our INSURANCE only covers people for FOUR visits to our meetings so if you have been to four meetings and have not become a financial member and intend to attend meetings you need to cover yourself and Permaculture Cairns by signing up as soon as possible.

You can pay at meetings, online to Permaculture Cairns Bank Account: BSB 704-966 A/c. 100009440 with your Surname as reference, or by Mail to PO Box 6535, Cairns, 4870.

That's it for this month, happy gardening, living, loving and producing.
Carol

LAST MINUTE ARRIVAL: A NOTICE FROM FROG SAFE

We are doing a plant raffle at the Carnival on Collins on September 1st and are still short of interesting plants to raffle off. Would anybody have something taking up space in their yard to donate to our raffle? It could be food plants, a large succulent, some exotics that you want to clear out to replace with productive plants – anything kind of moderate in size and a little showy! We need to have the plants organised by Saturday August 24th. If you want to bring any plants to the Permaculture Cairns meeting on Tuesday night the 20th August that would be great and much appreciated. Otherwise we can arrange for a pickup from your house (Cairns only please)
Thanks Deborah 4045 0373

Membership form coming up

Permaculture Cairns Membership Form

One year's membership fee - 1 Jan - 31 Dec:

Household membership \$30 ☐

Individual membership \$20 ☐

Name(s) of all applicant(s) & DOB if under 18yrs:
